### DETAILED ACTION

Guthikonda reports this compound, called 16 as “a light brown thick oil” and 6825187 uses the material but there is no indication of its preparation or form. There is no report of this compound in solid form. Applicants themselves obtain the compound as “light yellow thick material”, non-crystalline.

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 14-17, 19-20, are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for ethyl acetate and butyl acetate solvate of the compound, does not reasonably provide enablement for the base compound or its salt or other solvates. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

Applicants make the base compound and it is not-crystalline, consistent with the Guthikonda report. Applicants obtain Crystal I, Crystal II and Crystal III, but these are all the ethyl acetate or butyl acetate solvate of the base compound. It is thus clear that not all forms are crystalline.

Art Unit: 1624

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 provides for the use of the crystal, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 4, 5, 8-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The X Ray data must be presented in the proper form. If these angles are two theta, the claim must so state. The source of the radiation, e.g. Cu- $\alpha$  must be set forth.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 22 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Information Disclosure Statement***

References were struck from the 2 IDS 1449 documents because copies of these patents were not provided. Only the first page of the patent publications was tendered.

***Claim Objections***

Claims 3, 6, 7, 12, 13, 18, 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
